In order for your child to be charged the regular lunch price he/she must have the necessary components on his/her tray. Below is the components that they have to choose from. At least 3 components must be chosen in order for it to count as a complete meal. If the lunch they choose does not have necessary components, ala carte prices will be charged. Our team members do remind them at the register that they need to add a component in order for it to count as a full lunch.
